

**INTRODUCING**  
**European Wasp Care ©**

**EUROPEAN WASP CARE © IS A COST-EFFECTIVE SOLUTION FOR PROTECTING YOUR PROPERTY DURING THE ENTIRE EUROPEAN WASP SEASON.**

**FEATURES**

**Full season protection**

**Scheduled visits for entire European Wasp Season.**

**Appropriate Bait and Traps for different phases of the season.**

**Service Report after each visit**

**Full payment in advance saves you money**

**Purchasing a European Wasp Care © Plan, can save a substantial amount of money and ensure that your home and property have protection during the entire European Wasp Season.**

**EUROPEAN WASP CARE ©**  
**A 30% saving on the estimate of installation and monthly replenishment of appropriate bait and traps until the start of Hibernation.**

**Each European Wasp Care © Plan is customised to suit the unique requirements of your property**

**HERE IS HOW IT WORKS:**

We perform a Site survey of your property to determine how many traps you will need, and the optimal location to install them. We then determine a schedule to maintain appropriate bait and traps for the entire Wasp Season.

The Site Survey will allow us to produce a written quote with discount.

Once our quote is accepted and **payment is received**, we will book a maintenance schedule for your property along with reminders.

If you are a current customer, we don't need to do the Site Survey as we already have your details to produce a written quote with the discount.

**Full payment in advance saves you money**  
**Can not be combined with any other discounts which we offer**

**Treatment Live Nests are charged seperately.**
